the most important scientist of the twentieth century and the most important artist had their periods of greatest creativity almost simultaneously and in remarkably similar circumstances this fascinating parallel biography of albert einstein and pablo picasso as young men examines their greatest creations picasso s les demoiselles d avignon and einstein s special theory of relativity miller shows how these breakthroughs arose not only from within their respective fields but from larger currents in the intellectual culture of the times ultimately miller shows how einstein and picasso in a deep and important sense were both working on the same problem

more than fifty years after his death albert einstein s vital engagement with the world continues to inspire others spurring conversations projects and research in the sciences as well as the humanities einstein for the 21st century shows us why he remains a figure of fascination in this wide ranging collection eminent artists historians scientists and social scientists describe einstein s influence on their work and consider his relevance for the future scientists discuss how einstein s vision continues to motivate them whether in their quest for a fundamental description of nature or in their investigations in chaos theory art scholars and artists explore his ties to modern aesthetics a music historian probes einstein s musical tastes and relates them to his outlook in science historians explore the interconnections between einstein s politics physics and philosophy and other contributors examine his impact on the innovations of our time uniquely cross disciplinary einstein for the 21st century serves as a testament to his legacy and speaks

to everyone with an interest in his work the contributors are leon botstein lorraine daston e l doctorow yehuda elkana yaron ezrahi michael l friedman jürg fröhlich peter l galison david gross hanoch gutfreund linda d henderson dudley herschbach gerald holton caroline jones susan neiman lisa randall jürgen renn matthew ritchie silvan s schweber and a douglas stone

this collection of essays by artists and mathematicians continues the discussion of the connections between art and mathematics begun in the widely read first volume of the visual mind in 1993 book jacket

this sumptuous and stunningly illustrated book shows through words and images how directly profoundly and indisputably modern science has transformed modern art beginning in the mid nineteenth century a strange and exciting new world came into focus a world of microorganisms in myriad shapes and colors prehistoric fossils bizarre undersea creatures spectrums of light and sound molecules of water and atomic particles exploring the invisible reveals that the world beyond the naked eye made visible by advances in science has been a major inspiration for artists ever since influencing the subjects they choose as well as their techniques and modes of representation lynn gamwell traces the evolution of abstract art through several waves beginning with romanticism she shows how new windows into telescopic and microscopic realms combined with the growing explanatory importance of mathematics and new definitions of beauty derived from science broadly and profoundly influenced western art art increasingly reflected our more complex understanding of reality through increasing abstraction for example a german physiologist s famous demonstration that color is not in the world but in the mind influenced monet s revolutionary painting with light as the first wave of enthusiasm for science crested abstract art emerged in brussels and munich by 1914 it could be found from moscow to paris throughout the book are beautiful images from both science and art some well known others rare that reveal the scientific sources mined by impressionist and symbolist painters art nouveau sculptors and architects cubists and other nineteenth and twentieth century artists with a foreword by astronomer neil degrasse tyson exploring the invisible appears in an age when both artists and scientists are exploring the deepest meanings of life consciousness and the universe

one of the most significant artists of the surrealist movement pablo picasso s oeuvre developed dramatically between the 1920s and 30s this book looks at his creative output during this period examining his various mediums such as painting sculpture and works on paper

quantum mind the edge between physics and psychology this is the second edition with new preface from the author in a single volume arnold mindell brings together psychology physics math myth and shamanism not only mapping the way for next generation science but also applying this wisdom to personal growth group dynamics social and political processes and environmental issues beginning with a discussion of cultural impacts on mathematics he presents esoteric but plausible interpretations of imaginary numbers and the quantum wavefunction in this context he discusses dreams psychology illness shape shifting moving among realities and the self reflecting universe bringing in not only shamanism but also the aboriginal greek and hindu myths and even sacred

geometry from the masonic orders and the native americans the book is enriched by several psychological exercises that enable the reader to subjectively experience mathematics counting discounting squaring complex conjugating physics parallel worlds time travel and shamanism shape shifting

exhibition catalogue exploring the influence of medieval catalan romanesque art on picasso s work

the reflections on historical and contemporary positions assembled here shed light on concepts of temporalities in the context of artistic practices in the 1960s and 1970s the pursuit for the situational processual and actual stirred up artistic and theoretical fields nowadays contemporary practices expand on these subjects by exploring the notion of anachronism the impermanence of one s own corporeality together with the performative and ephemeral qualities of the sonic amongst other relevant concepts the goal of this publication is to offer a deep dive into situation specific settings and to fundamentally explore how temporality is able to initiate action and structure our perception thereby affecting our bodies our senses how we communicate and how the present moment is shaped

picasso rewriting picasso looks at the period from 1935 to the late 50s when picasso produced over 350 texts and plays in both spanish and french only a quarter of these were published in his lifetime and there has been little consideration of how this prolific output of literature affected picasso as an artist and modernist explored here in depth for the first time kathleen brunner considers the impact that this legacy had on the traditions of painting and representation and the development of picasso s artistic vocabulary central to her conclusions are new readings of key paintings such as guernica the minotauremachia and the meninas series using information taken from his literary works picasso rewriting picasso is essential for any art lover with a wealth of new information and rarely seen images from his archives with extensive illustrations this volume is sure to become a vital part in expanding our knowledge of one of the most respected and prolific artists of the twentieth century
